ABOUT

Senior Software Developer with **6+ years** of experience in UI/UX, front-end development, and enterprise digital solutions. Currently at **PwC Taiwan**, responsible for the design and front-end development of external websites and internal systems, as well as the implementation of digital solutions for internal business processes.

Experienced in **Copilot Studio** and in building solutions with **Microsoft 365 & Power Platform tools, including Power Automate, Power Apps, and SharePoint Online**. Skilled in translating user needs and business scenarios into **workflow automation, AI agent solutions**, and combining UI/UX thinking with **low-code / no-code implementation**.

Previously worked at **HP Taiwan** for over five years, supporting the design and development of **enterprise internal systems** such as **PLM and ERP for global operations**. Strong background in requirement gathering, process analysis, wireframing, prototyping, UI design, and front-end implementation, with the ability to **turn business needs into practical system solutions**.

Also gained early UI design experience at **Trend Micro** and **Microsoft Taiwan**, with a foundation in responsive web design and interactive UI development.

Experienced with Figma, Adobe XD, HTML, CSS/SCSS, JavaScript, Git, and Agile workflows. Able to collaborate **across cross-functional and cross-regional teams**, support **POCs and solution delivery**, and apply technology to solve real business problems.
